Making NYC the biggest startup ecosystem in the world | Throwing some of the coolest hackathons in NYC | Ex-Founder | Venture Scout | Engineer
New York, New York, United States

Summary

I didn’t plan any of this.

I wanted to study Computer Science in undergrad… and somehow ended up in Electronics & Communication. Classic plot twist. But that detour weirdly worked out as I got to build a deep-tech product that ended up deployed in 80 institutions across India. Not bad for a kid who didn't even want that major.

After that, I spent two great years at Ford Motor Company and learned a ton… mostly that corporate life is not for me. So I went back to chase the CS dream and ended up at NYU.

And honestly? Day 1 at NYU was rough. Everyone felt freakishly smart. I had major impostor syndrome and kept wondering who accidentally let me in. But that same discomfort is what pushed me outside the classroom - mostly to founder events, where I finally felt like I belonged. And eventually, that pushed me to build something of my own.

I started Context as an international student with a big, borderline-delusional dream: reinvent education using AI. For a while, it looked like we were this close to the finish line… until everything fell apart in one day (long story; ask me over coffee). Another failure on the list.

But along the way, I accidentally became the guy hosting events. Since Jan 2025, I’ve thrown 75+ events for founders across NYC because I genuinely believe this city (I love NYC) can become the biggest startup ecosystem in the world, and I want to help make that happen.

So here’s where I’m at now:

I've failed at almost everything I've tried. I'm still figuring things out. And I know I'll fail again and probably multiple times. But I also know I'm not stopping anytime soon.

Because when I die, I just want people to remember me as someone who kept trying, who built cool things, who gave value, who didn't quit even when things made zero sense… someone who went all in.

If you made it this far, either I'm good at storytelling or you really needed a break from your to-do list. Either way, if I made you smile even once, let's connect coz I come with energy, humor, and plenty of self-roasting.

Experience

Wand AI
Full Stack Engineer
October 2025 - Present (1 year 1 month)
New York, New York, United States

Building the future of workforce.

EWOR
Venture Scout
March 2026 - Present (8 months)
New York, New York, United States

Looking for outlier founders!

localhost:nyc
Founder
January 2026 - Present (10 months)
New York, New York, United States

Making NYC the biggest startup ecosystem in the world!

Tavern Community Coworking
Strategic Advisor
August 2025 - Present (1 year 3 months)
New York, New York, United States

Redefining Coworking and Community!

Context

Founder & CTO
June 2024 - October 2025 (1 year 5 months)
New York, New York, United States

Transforming education using AI

New York University
Graduate Assistant
April 2024 - May 2025 (1 year 2 months)
New York, New York, United States

got paid for messing around with computers

Ford Motor Company
1 year 10 months

Software Engineer
May 2023 - June 2023 (2 months)
Chennai, Tamil Nadu, India

Led some cool projects.

Junior Engineer
September 2021 - April 2023 (1 year 8 months)
Chennai, Tamil Nadu, India

My first real full-time job where I loved working with my team!

FYI Health
Product Developer Intern
May 2020 - July 2020 (3 months)
Delhi, India

Built a revolutionary product during Covid-19 that was deployed in over 80 schools and hotels in India.

Education

The Residency
Founder in residence, synapse · (September 2026)

New York University
Master of Science - MS, Computer Science · (September 2023 - May 2025)

SRM University
Bachelor of Technology - BTech, Electrical, Electronics and Communications Engineering · (July 2017 - June 2021)
